Subject: Comments on proposed hospital development options

Categories: In log

I strongly feel that a new hospital on a greenfield site should not have been ruled out - even if it had to be built in stages so that further funding could be sought.

I feel the CCG should have been more proactive in putting forward the argument for this on behalf of the population they serve.

Our hospital services have been allowed to deteriorate to an unacceptable level. We have a large, and growing, population that should be provided with state of the art facilities such as other areas enjoy.

If I had to choose one of the options given, I feel only option 4 could be in any way acceptable. However, the new-build should be on a site that is large enough for future expansion, as further funding is obtained. (The site should be protected for this).
